

WebRAT: Web-Based Report Analysis Tool

Robust Collections Reporting for Multiple Platforms

Labrynth's WebRAT takes credit, collections, and recovery reporting to the next level.

Most off-the-shelf collections software applications lack robust reporting and analytical capabilities, particularly with respect to analyzing the A/R portfolio.

Labrynth has created a reporting tool that facilitates the analysis of a collections environment, and can be *implemented rapidly, without significant development costs* — the **WebRAT™**.

- The WebRAT™ can be used to deliver a multitude of reports, and is built directly from client data files.
- Supports drill-down, sorting, and searching within a report.
- Custom queries can be built 'on the fly' using the WebRAT's Query Builder™ functionality.
- Reports can be viewable tables or charts, or can be exported to MS Excel as data files.

WebRAT™ Architecture

The WebRAT™ incorporates the following technologies:

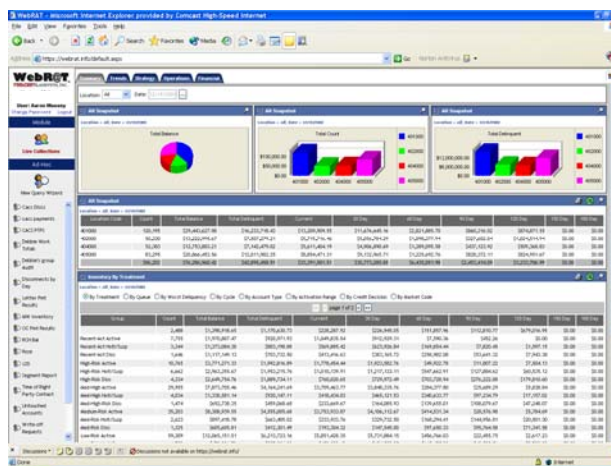

- MS .Net Framework
- VB.Net
- ASP.Net
- SQL Server 2000
- Visual Basic

WebRAT™ Features

The WebRAT™ incorporates key features to provide for robust, flexible reporting, and to enhance usability. Key features of the WebRAT™ include:

- Client-specific report structure
- Customized tabs for different groups of reports
- Standard suite of reports including:
 - Performance Dashboards
 - Financial Analysis
 - Portfolio Analysis
 - Forecasting
 - Strategy and Activity/Process Analysis
- Client-specific report layout for each tab
- Data analysis in various formats, including user-friendly tables and charts

Labrynth leverages its call center and collections expertise to ensure that reports meet each client's needs. Labrynth can also assist with report design, and provide training to management and end-users.

The WebRAT™ reporting tool leverages data from a client's current systems, such as collections, billing, and predictive dialer applications. Typically, clients begin with a set of standardized reports. In addition, customized reports can be designed.

The Labrynth WebRAT™ Difference

How is Labrynth's WebRAT™ different from other reporting applications?

- Designed to support the *most widely used collections applications available* in the market today.
- Built with Microsoft tools and standards.
- Secure, web-based application, requiring user authentication to access client data.

About Labrynth, Inc.

Labrynth, Inc. is a Chicago-based professional services firm specializing in Business and Technology Consulting, Project Management, and Call Center Operations. Using an approach that is based on people, process and technology, Labrynth, Inc. offers complete solutions, tightly coupled with the overall business objectives of our clients. Our consulting know-how, combined with project management skills and expertise, allow us to truly partner with our clients to achieve successful project delivery.

Labrynth's consultants lead teams, facilitate change, communicate effectively and deliver results.

Contact us today to find out what Labrynth can do for your organization.
